

Feel comfortable in your building

# HIGH-LIGHT

## CATALOGUE

For over 45 years, the internationally active family company B.E.G. Brück Electronic GmbH, with its headquarters in Lindlar, Germany, has stood for quality and innovation. Since the beginning, the focus of our employees has been on satisfying customers.

**1975** The foundation stone of the comprehensive product range was the development and production of emergency luminaires.

**1979** A fire destroyed the entire company building overnight, and administration and production had to be rebuilt.

**1986** B.E.G. was one of the first companies in Germany to start manufacturing motion detectors and automatic luminaires. To promote these products, the trademark LUXOMAT® was registered.

**1999** The first B.E.G. branch was founded in France. Since then, the number of branches has been steadily increased.

**2000** Development of the first occupancy detectors with brightness sensors for daylight-dependent lighting control. Since then, the range of detectors for daylight- and presence-dependent lighting control has been continuously expanded.

**2007** Inauguration of the European sales and logistics centre.

**2014** The new administration and training centre was built directly adjacent to the production and sales centre.

**2017** The former administrative headquarters of B.E.G. is converted into a research and development centre with its own lighting laboratory.

**2020** To mark the company's anniversary, the central warehouse in Lindlar is expanded to 8,000 square metres to cope with the distribution of 2.5 million products per year.

**2021** We pack efficiently with the help of the Autostore: the newly introduced semi-automatic storage system has been installed in the B.E.G. hall and has been supporting the entire logistics process ever since.

# ALEUM HIGHLIGHT YOUR HOME THROUGH MOTION

- Timelessly clear design, high-quality technology
- "Glow", selectable accent lighting in 8 colours
- 3 m to 16 m range
- Crawl protection
- Electronically + mechanically adjustable
- 4 Sensors
- Available in 2 colour variants
- Bluetooth

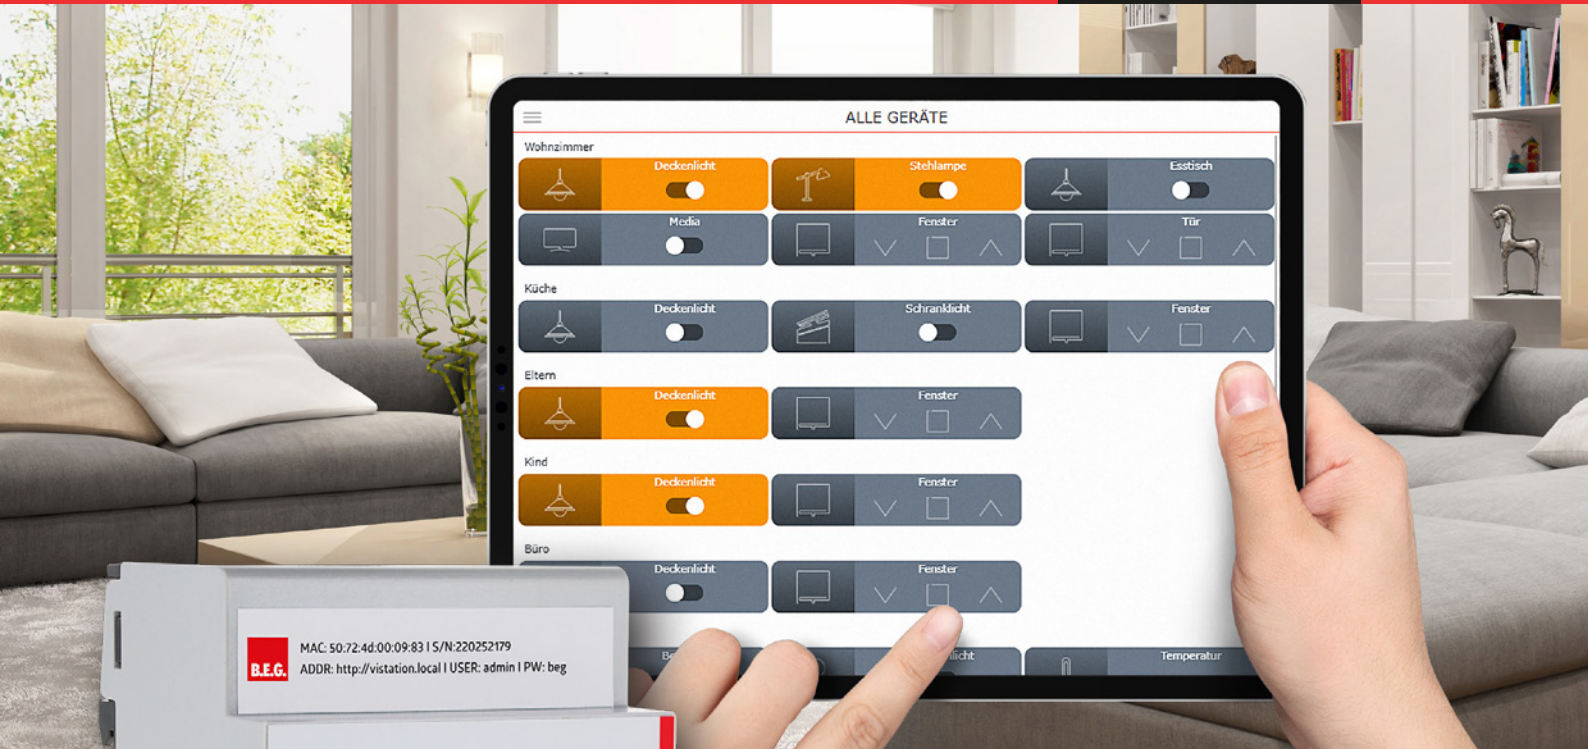

## The new motion detectors with Glow

Lovers of minimalist architecture want stylish designer devices for the building façade. B.E.G. fulfils this wish with the new Aleum outdoor motion detector models. Their design language is timelessly clear; like two cubes standing on top of each other. At the same time, the high-quality B.E.G. technology allows the owner customisation options.

Aleum Glow White Bright (WB)    Prod.No. 93132  
 Aleum Glow Anthracite Dark (AD)    Prod.No. 93134

# ViSTATION

## INDIVIDUAL VISUALISATION FOR KNX

The B.E.G. ViSTATION offers a visualisation of a building automation system that is as individual as the system itself. Using plans, graphics, photos or drawings, the integrator creates a customised solution for his customer.

ViStation-KNX-REG Prod.No. 93335

- Simple and clear: With the platform-independent web interface, any standard commercial tablet with a suitable mounting frame can be used as a cost-effective control panel.
- Simple operation in KNX: All in the KNX system values used such as temperature, brightness, open doors/windows, etc. can be monitored via the visualisation and can be viewed on the website of the company.
- Simple operation with DALI-SYS: As with KNX ViSTATION supports visualisation with DALI-SYS.
- And much more ...: Function blocks, MQTT, Remote access, scalability

**Casambi**

# PD2N-CAS DALI-2 WIRELESS ALL-IN-ONE SOLUTION FOR SMALL ROOMS

- Casambi-capable presence detector for small rooms
- With a detection range of up to 10 m and 2 light sensors perfectly suited for use in smaller rooms
- Can be networked wirelessly and customised in colour using accessories for great flexibility
- Flexible and quick parameterisation of individual sensors via Smartphone/tablet via Casambi app
- Mixed light measurement using internal and external light sensor, can be customised to suit the application
- Extension of the detection range with additional B.E.G Casambi devices possible

With the new Casambi-compatible PD2N-CAS DALI-2 and PD2N-CAS presence detectors, the ideal wireless all-in-one solution is now also available for smaller rooms. DALI luminaires can be controlled directly with the PD2N-CAS DALI-2 via the integrated DALI-2 power supply. The single master device can be connected to the DALI line without much installation effort and yet scenes and functions across lines are possible thanks to wireless communication. The combination of PD2N-CAS DALI-2 and PD2N-CAS is an excellent addition to DALI luminaires and offers all the functions required in the office environment.

PD2N-CAS DALI-2    Prod.No. 93476  
 PD2N-CAS            Prod.No. 93477

PD2-CAS-GH

PD2-CAS-GH DALI-2

- Range:  
tangential / radial  $r = 4 \times 8 \text{ m}$
- 180°
- 60 GHz HF for the best possible radial detection,  
in corridors
- Flat, modern and attractive design,  
in black & white
- Simple assembly
- Glossy & matt: various surfaces
- Dimension: 55 x 55 mm

## INDOOR HF

When installing wall sensors in corridors, it should be noted that mounting them at the ends of the corridor instead of on the long side results in a shorter detection range. This is due to the fact that in such an arrangement the sensor is not in line with the direction in which people are walking, but is moved radially towards the sensor. For this reason, B.E.G. has developed the Indoor-HF, which is equipped with HF sensors rather than PIR sensors and therefore offers a wider radial detection range.

Indoor HF-1C      Prod.No. 93261  
Indoor HF-1C      Prod.No. 93263

## Indoor 180N

- Range:  
tangential r = 16 m, radial r = 3 m
- 180°
- Acoustic sensor
- Simple assembly
- Glossy & matt:  
various surfaces
- 1 PIR sensor facing the floor,  
for mounting above doors
- Dimension: 55 x 55 mm

## INDOOR 180N

In addition to the light sensor and the 3xPIRs, the Indoor 180N is equipped with a precise acoustic sensor. This automatically extends the run-on time for any noise. This makes it ideal for toilet facilities.

Corridors are also an ideal area of application for the Indoor 180N. Thanks to the special lens, the wall sensor has a unique detection range.

The Indoor 180N impresses with simplified installation, an extended detection range and an additional PIR sensor at the bottom, making it suitable for installation above doors.

# GET OFF TO A FLYING START INTO THE MODERN WORKING WORLD!

Our innovative LUXONET® building automation system creates efficiency and freedom for our best! Planners, system integrators and electrical installers can look forward to effective, location-independent work as well as simplicity and time savings on the construction site. As a result, the new LUXONET® makes work much easier and offers competitive advantages.

## NEW AND ESPECIALLY FOR YOU

- a building automation system with Human Centric Lighting for Smart Buildings
- the LUXONET® Portal: a cloud-based software with basic view, virtual rooms, devices, automations and field line planning as a project planning environment
- a fieldbus controller as a playback device for script-based automations, local maintenance interface and link to the cloud
- a fieldbus gateway as a playback device for script-based automations, local test centre for field line installation and link to DALI luminaires, sensors and push-buttons
- a comprehensive, constantly evolving range of DALI sensors and push-buttons for seamless integration into LUXONET®

Learn more

### FB Controller

Memory programmable Fieldbus controller for an energy-efficient, convenient and safe building automation with LUXONET®.

 Parameterisation:  
via web application

 max. 10 W

 90 x 144 x 64 mm  
(8TE)

 3x USB 2.0  
 3x LAN 100 Mbit/s  
 1x Serial

Learn more

### FB Gateway DUO DALI-2

The DUO DALI-2 fieldbus gateway is a device with 2 integrated Multimaster DALI application controllers for more energy-efficient, convenient and safe building automation with LUXONET® from B.E.G.

 Parameterisation:  
via web application

 max. 13 W

 90 x 108 x 64 mm  
(6 HP)

 2x LAN 100 Mbit/s  
 2x DALI

Learn more

### BMS DALI-2

DALI-2 certified sensors and push-buttons for seamless integration into the LUXONET® system.

 Parameterisation:  
via web application

 4-7mA

 from the DALI bus,  
max. 22.5 V DC

Learn more

### DALI-2 luminaires and actuators

LUXONET® supports all DALI-2 certified control gear across manufacturers. Our own range includes Tuneable White luminaires and switch actuators.

 Parameterisation:  
via web application

The illustrations in this catalogue regarding the design, size and colour of the appliances are non-binding. we reserve the right to make technical and design changes for the purpose of product improvement, as well as errors.
